CONTRACT INFORMATION

Schedule Title: Environmental Services

Contract #: GS10F0006L

Contract Period: September 2005 thru September 2010

Contractor DUNS Number: 15-481-5674

Contractor CAGE Number: 0GJJ3

Contract Administration:

Dr. Kevin J. Phillips, P.E.

FPM Group

909 Marconi Avenue

Ronkonkoma, NY 11779

Telephone: 631-737-6200

Facsimile: 631-737-2410

E-Mail: K.Phillips@FPM-Group.com

Business Size: Large

DESCRIPTION OF SERVICES OFFERED

SIN 899-1 Environmental Planning Services and Documentation

Expert planning helps you to comply with the appropriate regulations, address public concerns, and anticipate long-range problems. FPM Group's planners, engineers, biologists, ecologists, and environmental scientists have the expertise and experience required to perform environmental impact analysis and other related planning surveys and studies.

Such services include:

Environmental Impact Statements (EISs) and Environmental Assessments (EAs) under the National Environmental Policy Act (NEPA)

- Preparation of Environmental Impact Statements (EISs) and Environmental Assessments (EAs).
- Preparation of Findings of No Significant Impact (FONSI) and Records of Decision (ROD).
- Public participation plans and public scoping meetings and hearings.
- Coordination with regulatory agencies (e.g., Section 7, consultation under the Endangered Species Act [ESA] and Section 106, consultation under the National Historic Preservation Act [NHPA]).
- Preparation of Resource Baseline Studies and Environmental Baseline Surveys (EBSs).

Natural Resource Studies and Management

- Biological and ecological monitoring studies, flora and fauna surveys, and habitat identification, analysis, and mapping.
- Threatened and endangered species studies and biological assessments in accordance with the ESA.
- Wetlands studies, delineation, mapping, mitigation planning, and Waters of the U.S. Determinations in accordance with the Clean Water Act (CWA).
- Soil erosion studies.
- Natural Resource Management Plans.
- Ecological Risk Assessments.

Cultural Resource Studies and Management

- Background archival investigations and preparation of technical reports.
- Terrestrial archeological surveys.
- Architectural assessment and documentation.
- Environmental assessment, impact, and resource documents.
- Cultural resource management plans.
- Agency coordination, as required under the National Historic Preservation Act (NHPA).

Planning and Economic Analysis

- Siting studies, installation planning, regional planning, and master planning.
- Land use planning (Integrated Land Use Management Plans).
- Facility master planning, Basic Facility Requirements (BFRs), Capital Improvement Plans (CIPs), Base Exterior Architecture Plans (BEAPs), and Facility Condition Assessments (FCAs).
- Air Installation Compatible Use Zone (AICUZ) and Range Compatible Use Zone studies.
- Transportation planning, traffic studies, forecasts, and modeling.
- Economic impact studies, socioeconomic assessments and environmental justice analysis.

- Geographic Information Systems (GIS) development, implementation, and training.

SIN 899-2 Environmental Compliance Services

Today there is a labyrinth network of state, Federal, and international environmental regulations. FPM's flexible team of technical specialists, scientists, and engineers keep abreast of trends and anticipate regulatory changes. FPM Group provides such expertise in the assessment and management of environmental compliance issues.

Our Environmental Compliance Services Include:

Environmental Compliance Audits

- FPM Group has conducted multimedia compliance audits for industrial clients and DoD. Using Federal, state, host-country, or international (ISO 14000) compliance assessment manuals that cover from 14 to 20 major environmental regulations and program areas (depending on the manual), FPM personnel conduct compliance audits through record searches, site visits, and interviews with facility and installation personnel.
- Corrective action plans that include alternative fixes and cost estimates. In addition, FPM has experience providing ISO 14000 support, including gap analysis, corrective action plans.
- FPM conducts seminars on all major environmental laws including the Clean Air Act (CAA), Resource Conservation and Recovery Act (RCRA), Emergency Planning and Community Right-To-Know Act (EPCRA), and Comprehensive Environmental Response Compensation and Liability Act (CERCLA).

Compliance Management Planning

FPM provides compliance management planning support in most major compliance areas, ranging from air emissions to groundwater quality. FPM's knowledge and experience performing studies and investigations in response to the major Federal laws and regulations allow FPM to offer a wide variety of environmental compliance services, such as:

- Air emission inventories, monitoring, process modeling, indoor air quality studies, Title V air permits, Air Quality Management Plans.
- Asbestos/Lead Surveys, Corrective Action Plans, Comprehensive Asbestos/Lead Management Plans.
- Storm water Studies, National Pollutant Discharge Elimination System (NPDES) Permits, agency coordination, and Storm water Management Plans.
- Underground Storage Tanks (UST) inventories, investigations, removals, upgrades, and UST Management Plans.
- Spill Prevention Control and Countermeasures (SPCC) Plans and Oil and Hazardous Substance Spill Contingency (OHSSC) Plans.
- Potable water surveys, testing, and Safe Drinking Water Act (SDWA) Management Plans.
- Pollution Prevention Opportunity Assessments and Pollution Prevention Plans.

SIN 899-4 Waste Management Services

Waste management services are split between hazardous and solid wastes. Having expertise in both areas, FPM Group is able to identify areas of contamination, assess the risk that the contamination poses to human health and the environment, and develop cost-effective remediation or waste reduction strategies.

FPM offers the following Waste Management Services:

Resource Conservation and Recovery Act (RCRA) Hazardous Waste Management Services

RCRA requires compliance with federal and state statutory and regulatory requirements to track hazardous wastes from cradle to grave. Hazardous waste management under RCRA is complex and requires the services of experts. FPM provides many hazardous waste management services, such as:

- Air, soil, surface water, and groundwater investigations and modeling.
- RCRA Facilities Assessments and RCRA Facilities Investigations.
- Corrective Measures Studies and Corrective Action Plans.
- Corrective Measures Implementation.
- Risk Based Corrective Actions.
- Risk Assessments, including Tier I and II Exposure Evaluations.
- Compliance monitoring.
- Data management.

RCRA Solid Waste Management Services

FPM provides solid waste management planning services for activities regulated under federal (RCRA Subtitle D) and state regulations. FPM professionals have been instrumental in the development of innovative approaches to solid waste management, including recycling/reuse program design, market analyses, establishment of business consortiums for cost-effective vendor pick-ups, characterization of waste for incinerator design and ash disposal requirements, and development of future land use plans for landfills. FPM's solid waste management services include:

- Landfill Reclamation
- Recycling/reuse programs
- Solid Waste Engineering and Economic Feasibility Studies
- Solid Waste Management Plans
- Landfill gas/water long term monitoring programs

Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) Hazardous Waste Management Services

CERCLA and the Superfund Amendments and Reauthorization Act (SARA) regulate the evaluation and remediation of inactive sites that have been contaminated by past practices. FPM's experience with CERCLA spans the full spectrum of CERCLA requirements, as highlighted below:

- Air, soil, surface water, and groundwater investigations and modeling.
- Preliminary Assessments and Site Investigations.
- Remedial Investigations and Feasibility Studies.

- Management Action Plans.
- Engineering Evaluation/Cost Analysis.
- Preparation of Decision Documents and Records of Decision.
- Remedial Designs and Remedial Actions.
- Remedial Action Surveillance and Oversight.
- Public participation support.
- Long-term monitoring.
- Phase I and Phase II Environmental Baseline Surveys.
- Data management.

SIN 899-7 Geographic Information Systems (GIS)

A Geographic Information System (GIS) is a tool for managing and analyzing data spatially. FPM Group uses this technology to transform data into clear, visual information for display and analysis. With GIS, information is integrated and associated with spatial geometry. This allows the user to clearly compare contrast data with the ease of programs such as ARC View and ARC Info. A GIS allows new meaning to be discerned from various data sets, leading to better, more informed decisions.

FPM Group uses the current software from GIS industry leaders to develop and apply GIS technology to all aspects of environmental services.

FPM Group's GIS Services are used for the following:

- Mapping and Cartography
- Natural Resource Planning
- Site Selection
- Pollution Analysis
- Emergency Preparedness Planning
- Enterprise-wide GIS implementation
- Custom GIS application development and integration

SIN 899-8 Remediation

Remediation is the culmination of a process that begins with discovery, investigation, engineering feasibility, cost analysis, and final alternative selection. After remediation the site is restored to an acceptable risk for whatever use the landowner requires. FPM performs the following activities both for DoD and private clients.

- Excavation, removal, manifesting, transportation, storage, treatment (on-site and off-site) and/or disposal of hazardous waste and hazardous materials
- Preparation, characterization, field investigation, conservation and closure of site
- Long Term Monitoring/Long Term Operation (LTM/LTO)
- Containment, monitoring and/or reduction of hazardous waste sites
- Ordnance removal and support

GSA PROJECT EXPERIENCE

DESCRIPTION

Project Categories: Environmental Advisory Services

Project Description:

As part of a five year, unlimited dollar amount Indefinite Delivery contract with the US General Services Administration (GSA), FPM has performed several task orders for Environmental Advisory Services. A listing of the task orders executed to date follows:

| WORK ORDER # | PROJECT TITLE |
|------------------|---|
| DASW01-01-F-0573 | Environmental Advisory Services; Griffiss AFB |
| DASW01-01-F-175 | AFCEE; Griffiss Nosedocks, RI |
| TIRNE-02-K-00021 | Andover Sampling, IRS Beckley Finance Center |
| TIRNE-02-K-00019 | Holtsville Sampling, IRS Beckley Finance Center |
| DACA05-03-F-0007 | USACE/EAFB Hazardous Waste Operation Assessment |
| 53-2349-2-0523 | Plum Island WMA-9 Remediation, USDA |
| 40-2349-3-0303 | Plum Island Construction Debris Disposal; WMAs 7-8, 24 |
| 40-2349-3-0307 | Plum Island WMA 26/27 and 2 Miscellaneous Sites Remediation |
| DACA63-03-F0130 | Nellis AFB, EA for Landfill Exp. Construction at Tonopah Test Range |
| DACA05-03-D-0041 | Edwards AFB, Upgrade Bulk Waste POL Facility |

An example of one task order under this contract follows:

Construction Debris Disposal, Plum Island, NY

FPM was retained by United States Department of Agriculture (USDA), Plum Island Animal Disease Center (PIADC) to remove and/or recycle non-hazardous construction and demolition debris accumulated at Waste Management Area No. 9 (WMA-9) located on Plum Island, NY. Approximately 10,000 cy of waste material, including scrap metal, wood, concrete, and miscellaneous material, was present at WMA-9 from past demolition projects on the island.

The project involved separating and processing the materials according to different waste categories (e.g., concrete, wood, metal etc.). Concrete waste was processed by a concrete crusher for PIADC's future use as roadbed fill material. Wood-based material was mulched by a wood grinder and was piled at WMA-9 for eventual land application or burning by PIADC. Metal, uncrushable concrete, unmulchable wood and other miscellaneous materials were transported off the island to a mainland recycler. Commercial and government ferries were utilized for transportation of equipment, personnel and waste materials from the island. The project was completed on time and within the budget allocated.

FPM GROUP'S LABOR RATES

| Labor Category | Gov't Hourly Rate |
|---------------------------|--------------------------|
| Program Manager | \$157.11 |
| Project Manager | \$173.19 |
| Engineer VII | \$149.72 |
| Engineer VI | \$121.05 |
| Engineer V | \$113.48 |
| Engineer IV | \$94.11 |
| Engineer III | \$82.40 |
| Engineer II | \$71.61 |
| Engineer I | \$61.76 |
| Scientist VII | \$149.72 |
| Scientist VI | \$111.01 |
| Scientist V | \$86.87 |
| Scientist IV | \$77.35 |
| Scientist III | \$56.64 |
| Scientist II | \$54.64 |
| Scientist I | \$49.19 |
| Architect II | \$101.52 |
| Architect I | \$71.42 |
| Technician | \$43.72 |
| CADD Operator III | \$74.74 |
| CADD Operator II | \$53.52 |
| CADD Operator I | \$48.76 |
| Administrative Support II | \$68.61 |
| Administrative Support I | \$52.10 |

CONTRACT PERIOD

| | |
|---------|---------------------|
| Year 6 | 10/01/05 to 9/30/06 |
| Year 7 | 10/01/06 to 9/30/07 |
| Year 8 | 10/01/07 to 9/30/08 |
| Year 9 | 10/01/08 to 9/30/09 |
| Year 10 | 10/01/09 to 9/30/10 |
